Latest Advances in Retinal Diseases

27-29 April 2007
Singapore
Gleneagles Hospital

A medical retina course you cannot afford to miss.

Latest Advances in Retinal Diseases

Diabetic retinopathy is becoming more common and will be the most important cause of blindness in Southeast Asia and Asia. This meeting highlights the latest on retinal diseases, especially age-related macular degeneration, and also emphasises the latest in the management of complicated diabetic retinopathy.

You can prevent blindness from diabetic retinopathy and other retinal conditions

- Lucentis & Avastin for exudative AMD
- Photodynamic therapy – Is there still a role for it?
- Therapeutic strategies for diabetic maculopathy
- Managing proliferative diabetic retinopathy in anti-VEGF era
- Genetics of AMD
- Stem cell research in retinal rescue – where are we now?
- Current concepts in the management of CSCR
- Diabetic Retinopathy – danger of blindness

Dear Colleagues

International Macula Meeting 2007 INTO THE FUTURE

As the world's population ages, we will see a dramatic increase in the conditions affecting the eye, in particular, conditions affecting the retina. It has become essential for eye surgeons to keep abreast of the latest developments in ophthalmology. Already such information is easily available to doctors and patients on the internet.

This meeting puts together the latest advances in medical retina and presents the evolving approaches to the treatment of diabetic retinopathy, which will be the most important cause of blindness worldwide. The latest treatment methods will be discussed by 12 retinal experts led by Prof Ian Constable, Prof Paul Mitchell, Prof Wong Tien Yin and Dr Adrian Koh. I am particularly proud that Dr Adrian Koh has emerged as one of the world's leading experts on medical retina.

We look forward to more exciting developments on the retina in the future, and to seeing you from 27 to 29 April 2007.

Some of Asia's best-known medical and surgical retinal experts, teachers and researchers will be our distinguished speakers.

Guest Speakers

Ian Constable Australia
(Leading Research Clinician in medical retina, especially diabetic retinopathy)

Paul Mitchell Australia
(Expert in diabetic retinopathy)

Wong Tien Yin Australia
(Expert in diabetic retinopathy)

Adrian Koh Singapore
(Renowned medical retinal surgeon in Asia-Pacific)
